Map Settings

Home Locator Settings

This is the locator screen, which has the actual map for the application.

This red dot represents the user's current location, and the Dude Truck logo represents the closest food truck that matches their preferences.

Map Settings

This button will take the user to the map settings screen.

Food Truck Preferences

This is the general settings page. In the final version of the app, each link will open a new page or window.

Map Preferences

The food truck preferences will include options like price and dietary restrictions.

Feedback

Map preferences include options such as maximum distance shown between user and food trucks.

The feedback button is pretty self-explanatory; it lets customers send messages, complaints, and wanted feature suggestions to an account linked to Dude Truck.
